

Modelo de datos de contenido

UCSE - SEIA

Modelo de datos de artículos

```
create table articles (  
    article_id          integer primary key,  
    creation_user       not null fk users,  
    creation_date       not null date,  
    last_update_date   null date,  
    title               varchar(200),  
    body                varchar(MAX),  
    status_id           integer fk articles_status,  
    category_id         integer fk articles_categories  
);
```

Modelo de datos de comentarios

```
create table comments (  
    comment_id      integer primary key,  
    creation_user    not null fk users,  
    creation_date    not null date,  
    last_update_date null date,  
    body            varchar(MAX),  
    status_id        integer fk comments_status  
    refers_to        integer fk comments  
);
```

Modelo de datos de noticias

```
create table news (  
    news_id            integer primary key,  
    creation_user      not null fk users,  
    creation_date      not null date,  
    last_update_date   null date,  
    title              varchar(200),  
    body               varchar(MAX),  
    status_id          integer fk news_status  
);
```

Modelo de datos general?

```
create table content_raw (  
    content_id          integer primary key,  
    creation_user       not null fk users,  
    creation_date       not null date,  
    last_update_date    null date,  
    title               varchar(200),  
    body                varchar(MAX),  
    status_id           integer fk content_status,  
    category_id         integer fk content_categories,  
    content_type        integer fk content_types,  
    refers_to           integer fk content_raw  
);
```
